

PROCEDURE TO CHANGE OIL ON THE DRIVE:

What you'll need:

- Kleen-Flo TKO Automatic Transmission Flush - 2 Step
- Mobil DTE FM 320 food grade oil or any food grade oil with a 320 ISO (or SAE 90W)

Procedure:

- Run the equipment for 5-10 minutes to allow the oil to heat up;
- Empty the blue bottle (step 1, Kleen-Flo TKO Flush) in the drive by unscrewing the filler cap:

- Run the equipment for 5-10 minutes;
- Drain the oil through the drain plug located under the drive:

- Fill the drive with oil up to a little bit above the level inspection window:

Level suggested

Oil level inspection window

- For food grade oil, it is suggested to fill and drain twice to make sure there is no more contaminants.
